

Helena

Character Description:

You're a passionate advocate of artistic excellence, always seeking to fuse art with innovative trends. You are super ambitious, charming, intelligent woman, with an excellent education and with a character that is both arrogant and manipulative. You know how to inspire a team to give their best, but often at the cost of burnout and private sacrifice.

Description of the Organization Represented:

Representing the EUREKA Festival in Venus—a dynamic mid-sized university city celebrated for its tech labs and sustainable urban development— you combine art and science in a special way. The festival attracts experimental artists and revolutionary cultural institutions, making it a place where creative ideas can develop and grow.

Your Responsibilities in the Oracle Project:

Your role involves curating artistic programming that combines innovative art with scientific ideas, making sure that your festival is always at the top of the list of popular cultural events. You manage artist residencies, organize collaborative workshops, and maintain high standards across all activities. By aligning creative projects with the broader project goals, you help position the festival as a leader in merging art with technology.

Individual Goal:

Since you are facing personal challenges, your goal is to complete quest #1 without speaking. You must rely on facial expressions and gestures until the time of quest #2.

Your 2nd goal: During quest #7 do not allow to choose any candidates with low artistic relevance & choose at least one with high artistic relevance (not necessarily 3 sister revisited!).
