

# Gaia

## **Character Description:**

You're a dedicated Project Partner with a passion for community engagement, leading the Work Package 3 "Engaging Local Communities." Former municipal manager, you have been coordinating the network for 5 years. Having passed your professional zenith, you are full with lots of experience, patience, reliability, with great capacity for empathy and negotiation. Lacking large-scale success and recognition you nurture a buried feeling of frustration.

## **Description of the Organization Represented:**

You come from a strong network of Municipal Theaters and Periphery Festivals, all rooted in Calixto—a town that's part of a vibrant network of six municipalities. These towns, a combination of former industrial and rural areas, bring unique cultural insight to international projects.

## **Your Responsibilities in the Oracle Project:**

Your role in WP3 is to create meaningful connections between the project and local communities. You design engaging events, run interactive workshops, and organize public consultations to ensure everyone's voice is heard. By coordinating with municipal authorities, your task is to make sure resources are used efficiently and the community feels involved in every step.

## **Individual Goal:**

As your organization often runs out of money, you're motivated to finish the project with at least 2 resources - securing the necessary funding to support both current activities and new community initiatives.
